# What's new from

## SeloAgro

THE WORLD OF AGRICULTURE AND CRAFTS

Every year we always bring something new in our collection. We are also try to find the possibility to combine various types of material and bring them to the products that all of our customer will love.

This year, we are proudly to present a new style of weaving. We call it "Jejet". This kind of weaving style can be use for various range of baskets products. Start from bags to storage and also for garden baskets.

We hope, it can be something big for rattan basket industries.

"Jejet" the new weaving style

# french style

## bintariti collection

Traditional wicker that usually made with willow, now we replace it with natural rattan.

We keep the French style as it is and do a little bit change in style to perfectly match with rattan material.

It is durable and stronger compare to willow.

For our collection we are not just offer rattan grey kubu but we can do with rattan lacak, slimit or croco material.

# Rattan CL- Garden Basket

One of our unique baskets came from a unique material. This material called **rattan cl**. It is thicker than any other material that we always use for basket.

It has a unique color and texture. A combination of gold color, dark and light brown. Sometimes a little bit yellowish created by nature.

The basket should be big and heavy. You can not make small basket with this material. In this collection there are some baskets that we make by split the cane into two so it can be bend well to make smaller basket.

This basket are so recommended for garden. You will never find this material for garden basket ☺
